**Comments / Affidavits Received From Faculty Using Podcasting In Their Instruction.**

"I think the student response was positive...many students asked about whether the final was going to be available as an MP3-- so clearly they seem to use/want the info. I'm not concerned that the recordings would reduce attendance though I'm sure some students would end up doing that. The equipment was not a problem though I think we had a glitch for the first midterm.

thanks !  
Dr. Applegate"

"I thought the recording experience was great! It did not affect my ability to give lectures at all, it was easy to do, and students tell me that they used it. I do not think it effected class attendance and I would certainly like to use the recording again.

Thanks!  
- Mike Ennis"

---

"...my students were very positively inclined" - the big comments I got were the voices were clear, you don't have the echoing problem (with the students own recorder)...for (PSC) 101, i don't thing the absences were particularly great...

Richard Coss"

"Rodd: Thanks for the quick response and phone assistance. I like the interface and the thought that went into the defaults. My audio file is up and running and I've alerted my students, who I'm sure will be very excited. As an added bonus, I can now serve as my own example of a campus instructor who has been set up for podcasting in less than an hour.

Thanks again.  
Jon (Wagner)"

Dr. Coss and Dr. Owings have been participating in the podcasting service since the Fall 2005 pilot. I have been in contact with them each quarter and they consistently express their satisfaction in the permanent digital recorder (i.e. not the portable unit) and the ease of the uploading system. They have asked me to push for the installation of another permanent recorder in 194 Young Hall. (from Rodd Kleinschmidt, CTS)
